ORCID ID: 0000-0001-5541-6087

Education

- Doctor of Philosophy, Astronomy, Georgia State University, Atlanta, USA (2022)
  - Ph.D. thesis: "*Chemical Properties of the Local Galactic Disk and Halo Using Low-Resolution Spectroscopy of M dwarfs and M subdwarfs*" (Updated website: ScholarWorks @ Georgia State University)[1]
  - Advisor: Prof. Sebastien Lepine
- Master of Science, Astronomy, York University, Toronto, Canada
  - Master thesis: "*Photometric Calibrations of Metallicity and Temperature for M dwarfs* (YorkSpace)
  - Advisor: Prof. Michael De Robertis
- Master of Science, Atomic and Molecular Physics, University of Isfahan, Isfahan, Iran
  - Master thesis: "*Investigation of the Presence of C_{60} in the Interstellar Medium*"
  - Advisors: Prof. Azam Pourghazi and Prof. Ahmad Kiasatpour
- Bachelor of Science, Nuclear Physics, Isfahan University of Technology, Isfahan, Iran
  - Undergraduate thesis: "*Determination of the Absolute Activity of Radioactive Isotopes by the Coincidence Method*"
  - Advisor: Prof. Ahmad Shirani

Research Experience and Positions

- Postdoctoral research associate, University of Tarapaca (UTA), and member of the Center for Excellence in Astrophysics and Associated Technologies (CATA), Santiago, Chile (2025-present)
  - Research focus: High-resolution spectroscopic characterization of M dwarfs, developing a combined automatic code (AutoSpecFit+ AutoSpecNorm) to measure self-consistent parameters and elemental abundances and establish benchmark M dwarfs
- Postdoctoral research associate, the University of Kansas, Lawrence, USA (2022-2025)
  - Research focus: Developing an automatic code (AutoSpecFit) to measure the elemental abundances of JWST planet-host cool dwarfs using high-resolution spectroscopy and searching for chemical links between exoplanets and their host stars to probe the formation pathways of planetary systems
  - Advisor: Prof. Ian Crossfield
- Research assistant, Georgia State University, Atlanta, USA (2015-2022)
  - Research focus: Developing an automatic pipeline to determine the physical parameters of a large sample of M dwarfs and M subdwarfs using low-resolution spectroscopy and tracing the chemical properties of the local Galactic disk and halo
  - Advisor: Prof. Sebastien Lepine
- Research scientist, Astronomy, York University, Toronto, Canada (2014-2015)
  - Research focus: The photometric analysis of an old open cluster to estimate its age, metallicity, and distance
  - Advisor: Prof. Michael De Robertis
- Research assistant, York University, Toronto, Canada (2011-2014)

[1] As of April 2025, the previous website showed ~ 70 downloads.

- Research focus: Developing a photometric metallicity calibration to determine the metallicity of a large sample of M dwarfs and investigating the metallicity variation of these stars with their Galactic height in the disk as well as testing several Galactic chemical evolution models
    - Advisor: Prof. Michael De Robertis
- Graduate research course, York University, Toronto, Canada (2011)
    - Research focus: Investigating the statistical properties of Broad Absorption Line (BAL) quasars using large astronomical catalogs
    - Advisor: Prof. Patrick Hall
- Research assistant, University of Isfahan, Isfahan, Iran
    - Research focus: Studying the properties of the molecule C_{60} and investigating the possibility of the presence of this molecule in the interstellar medium
    - Advisors: Prof. Azam Pourghazi and Prof. Ahmad Kiasatpour
- Research staff, Physics, Isfahan Nuclear Technology Center, the Nuclear Engineering Department, Isfahan, Iran (resigned this position after one year to pursue graduate studies)
    - Main goal: Conducting and collaborating on different physics research projects using a zero-power nuclear reactor

Teaching Experience and Positions and

- Substitute lecturer, the University of Kansas, USA
    - ASTR 391 - Two-body problem, Kepler's laws (February 2024)
    - ASTR 691 - Temperature-pressure profile in the atmosphere of stars and planets (November 2022)
- Teaching assistant, Georgia State University, USA (2015-2019)
    - ASTR 1010 - Astronomy of the Solar System
    - ASTR 1020 - Stellar and Galactic Astronomy
    - PHY 1112 - Introductory Physics II
- Teaching assistant, York University, Canada, (2011-2013)
    - NATS 1740 - Solar System and Stellar Astronomy
- Full-time physics faculty, Azad University of Qom, Iran
    - In-class courses for undergraduate students:
        - General physics I, II, and III
        - Optics
        - Quantum Mechanics
        - Laser
        - Crystallography
    - Laboratories for undergraduate students:
        - General physics I, II, and III
        - Modern physics
        - Optics
    - In-class courses for graduate students:
        - Mathematical Physics
- Visiting physics lecturer, Shahid Rajaee Teacher Training University, Iran
    - In-class courses for undergraduate students:
        - General physics II
    - Laboratories for undergraduate students:
        - General physics I, II, and III
        - Modern physics
- Visiting physics lecturer, Azad University of Arak, Iran
    - In-class courses for undergraduate students:
        - General physics I and II

- Teaching assistant, University of Isfahan, Isfahan, Iran
    - Laboratories for undergraduate students:
        - General physics I and II

Teaching Development

- Teaching Training Courses and Workshops: Teaching Support Center, The University of Western Ontario, London (ON), Canada
    - The Language of Advanced Discussions (July 2010)
    - The Language of Advanced Conversations (July 2010)
    - Communication in the Canadian Classroom (June 2010)
    - The Teaching Assistant Training Program (May 2010)

Honors and Awards

- Conference scholarship for attending the HORS3S (High-Resolution Exoplanet and Stellar
- Characterization) conference, Spain, 2026
- Rodger Doxsey Prize (American Astronomical Society Award), USA, 2020
- Student Travel Grant for attending the CASCA meeting (Canadian Astronomical Society Grant), Canada, 2019
- Outstanding Second Year Graduate Student Award, Georgia State University, USA, 2018
- Outstanding Alumni Award in Physics, University of Isfahan, Iran

Professional Services in the Scientific Community

- Referee for Journal Papers: Nature, ApJ, AJ, MNRAS
- External referee for CFHT Community Survey Proposal (ambitious and large-scale observing programs with diverse scientific goals), 2026
- Reviewer for Gemini proposal (from Can TAC), 2026
- US National Science Foundation (NSF) reviewer panelist for the Astronomy and Astrophysics Research Grants (funding individual and collaborative research in observational and theoretical studies), 2026
- Reviewer for Gemini proposal (from Can TAC), 2025
- NASA reviewer panelist for the Astrophysics Research and Analysis (funding research relevant to NASA's programs in astronomy and astrophysics), 2025
- JWST external reviewer panelist for cycle 4
- Reviewer for CFHT proposal (from Can TAC), 2024
- NASA reviewer panelist for the Astrophysics Decadal Survey Precursor Science (funding research for developing future NASA flagship observatories), 2024
- The principal organizer of a splinter session at the conference "Cool Stars 22", 27 June 2024, San Diego, California
- JWST external reviewer panelist for cycle 3
- Chambliss student award judge, AAS Virtual Meeting #237, 2021

Departmental Services and Activities

- Hosting speaker seminar, Richard Archer (Blue Skies Space), the Physics and Astronomy Department, the University of Kansas, USA (April 2025)
- Organizing weekly Astro-coffee meetings to discuss the newest astronomy papers, the Physics and Astronomy Department, the University of Kansas, USA (2023-2025)
- Organizing monthly Astro-cake meetings to celebrate the birthday of astronomy members (professors, postdocs, and students) who were born in each specific month as well as to talk about the latest astronomical findings, the Physics and Astronomy Department, the University of Kansas, USA (2023-2025)

- Organizing weekly KU Exolab (a team led by Prof. Crossfield) meetings to discuss the research progress made by the team members, the Physics and Astronomy Department, the University of Kansas, USA (2022-2025)
- Special participant in KU Galaxies Group (a team led by Prof. Gregory Rudnick) meetings for the oral presentations of graduate students
- Organizing weekly Astronomy Journal Club to discuss the newest astronomy papers, the Physics and Astronomy Department, York University, Canada (2012-2013)
- The chairwoman of the Physics Department, Azad University of Qom, Iran
- Physics lab establishment (ordering and setting up the required devices and providing user-friendly handbooks for students):
    - Modern physics lab
        - Azad University of Qom, Iran
        - Shahid Rajaee Teacher Training University, Iran
    - Optics lab
        - Azad University of Qom, Iran
- Leading the optics/laser exhibition in the departmental symposium, Azad University of Qom, Iran

Observational Experience

- High-resolution, optical ARC Echelle Spectrograph (ARCES) at the “Apache Point Observatory”, Sunspot, New Mexico, USA
    - On-sight: 2 half nights, May 2017
    - Remote: 31 half nights, 2017-2021
- High-resolution 1.1-5.3 micron spectrograph, iSHELL, at the “NASA Infrared Telescope Facility”, Mauna Kea, Hawaii, USA
    - On-sight: 1 half night, February 2018
    - Remote: 1 half night, July 2018
- The McAlister 0.7-m Telescope, at the Hard Labor Creek Observatory, Rutledge, USA
    - On-sight: 2 full nights (winter 2016)
    - On-sight: Assigned services for public nights (2016-2019)
    - On-sight: Head coordinator for the public night on August 3rd, 2019
- The Miller 24-inch Telescope, at the Hard Labor Creek Observatory, Rutledge, USA
    - On-sight: Assigned services for public nights (2016-2019)
    - On-sight: Head coordinator for the public night on August 3rd, 2019
- The 60-cm Cassegrain and 1-m Telescopes, at the Allan I. Carswell Astronomical Observatory, York University, Toronto, Canada
    - Occasional operations and observations (2011-2014)

Accepted Peer-Reviewed Observing Proposals and Awarded Telescope Time

- Co-I: NIRSpec/JWST, Cycle 2, ***“Panchromatic Phase Curve of the Highest-S/N Hot Neptune”***, ID. #3231, PI: Ian Crossfield
- Co-I: IGRINS/Gemini-South, ***“Elemental Abundances of JWST's Exoplanet Host Stars”***, ID. GS-2023A-Q-203, PI: Ian Crossfield
- Co-I: IGRINS/Gemini-South, ***“Exo-EASY: Elemental Abundances via SpectroscopY of Exoplanet-hosting Cool Dwarfs”***, Large & Long Program, ID. GS-2023B/2024A-LP-108, PI: Ian Crossfield
- Co-I: IGRINS/Gemini-South, ***“Elemental Abundances of the Coolest HWO Targets”***, ID. GS-2023B-Q-414, PI: David Coria
- PI: iSHELL/NASA IRTF, ***“High-Resolution Spectroscopy of M dwarfs and M subdwarfs”***, ID. 2018A118

Student Research Advising

- Advisor of Dr. David Coria, former Astronomy PhD student at the University of Kansas, USA; currently a postdoctoral researcher at the University of New Mexico, USA.
  - The relevant results have been published in ApJ (974, 151) and presented in several conferences such as AAS meetings (2024 and 2025) and Cool Stars conference 22 https://coldestworldscs22.wordpress.com/2024/02/06/cs22-splinter-session/
- Two physics undergraduate students with projects regarding "Faraday Magneto-Optical Effect", Azad University of Qom, Iran

Organizing/Coordinating Conference Sessions

- Chair, December 6, 2024, Session 4B, Mid-American Regional Astrophysics Conference, The University of Kansas, Lawrence, USA
- The principal proposer/organizer and the chair of a splinter session at the conference "Cool Stars 22", 27 June 2024, San Diego, California:
  Planet-Host Cool Dwarfs: Star-Planet Connection and Tracing Planetary Formation and Composition
  - https://cs22-splinter-cool-dwarfs.webflow.io/
  - https://zenodo.org/records/13767049
  - https://coolstars22.github.io/index.html
- Chair, November 4, 2023, Session 4, Mid-American Regional Astrophysics Conference, The Benedictine College, Atchison, USA

Scientific Computing and Astronomical Tools

- Developer of **AutoSpecFit**, an automated line-by-line spectral model-fitting pipeline for determining atmospheric parameters and detailed elemental abundances in cool dwarfs. The pipeline operates in conjunction with its companion module, **AutoSpecNorm**, which provides a local normalization framework in which observed spectra are normalized relative to the synthetic models evaluated at each step of the fitting procedure.
  - Available at: https://github.com/nedahejazi/AutoSpecFit
- Contributing to **linemake**, a widely used linelist generator for spectroscopic analyses.
  - Available at: https://github.com/vmplacco/linemake
- Extensive experience in High-Performance Computing (HPC), including the parallel execution of large-scale spectral synthesis workflows for stellar parameter determination and detailed chemical abundance analysis using SLURM and PBS/TORQUE scheduling systems
- Coding with Python and Matlab
- Long-term experience working with Turbospectrum, IRAF, Spextool, and MOOG

Oral Contributed/Invited Talks and Poster Presentations

1. Accepted oral talk: ***"Chemical Fingerprints of Cool Dwarfs: Insights into Galactic Evolution and Planet Formation"***, The XXI Chilean Astronomical Society (SOCHIAS) Annual Meeting, 26-30 October, 2026, Universidad Técnica Federico Santa María, Valparaíso, Chile
2. Contributed oral talk: ***"Detailed Abundance Measurements of Cool Dwarfs: Prospects for Exploring the Galaxy from Stellar Populations to Star-Planet Chemical Connections"***, July 7, 2026, High-Resolution Exoplanet and Stellar Characterization Today and in the ELT Era (HORS3S), Granada, Spain
3. Invited oral talk: ***"Cool Dwarfs as Chemical Laboratories for Galactic Chemical Evolution and Planet Formation"***, April 29, 2026, Departamento de Astronomía, Universidad de Concepción, Concepción, Chile
4. Contributed oral talk: ***"Exploring Planetary Formation and Composition Using Detailed Chemical Abundances of Host Stars"***, April 28, 2026, The Chilean exoplanet community meeting (ExoChile), Universidad Católica de la Santísima Concepción, Concepción, Chile

5. 1-hour colloquium talk: "***Cool Dwarfs as a Bridge from Galactic Chemical Evolution to Planetary Formation and Composition",*** February 23, 2026, European Southern Observatory (ESO), Vitacura Office, Santiago, Chile
6. Invited oral talk: ***"Detailed Chemical Abundances of Cool Dwarfs: Probing our Galaxy from Star-Planet Connections to Ancient Stellar Populations"***, January 27, 2026, Macau International Forum Space and Planetary Science, Macau, China
7. 30-minutes oral talk: ***"Detailed Elemental Abundances of Cool Dwarfs to Explore Our Galaxy: From Star–Planet Compositional Links to Ancient Stellar Populations",*** November 25, 2025, Exoplanets and Astrobiology Zoom Yaps (EAZY) lunch talks, Santiago, Chile
8. Contributed oral talk: ***"A New Method to Measure the Detailed Chemical Abundances of Cool Dwarfs and Its Application to Star-Planet Chemical Connection Studies",*** October 15, 2025, Exploring Star-Disk-Planet Connections Conference, University of Tartu, Tartu, Estonia
9. Contributed oral talk: ***"Atmospheric Composition of JWST Planet-Host M Dwarfs to Trace the Interior Structure of Their Rocky Planets",*** January 16, 2025, American Astronomical Society, Meeting #245, National Harbor, USA
10. Contributed oral talk: "***High-resolution Elemental Abundance Measurements of Planet-Host Cool Dwarfs to Trace Planetary Formation and Composition of Two Extremes: Gas Giant and Small Rocky Exoplanets"***, December 5, 2024, Mid-American Regional Astrophysics Conference, The University of Kansas, Lawrence, USA
11. Invited oral talk: ***"Chemical Properties of M dwarfs: Tracking from Galactic Archaeology to Planet Formation and Evolution"***, June 25, 2024, Splinter Session - The Buddy System: Utilizing the Wealth of Host Star Data to Inform Substellar Physics, Cool Stars 22 Conference, San Diego, USA
12. Contributed oral talk: ***"Elemental Abundances of Planet-Host Cool Dwarfs: Clues on Planet Formation and Evolution"***, January 11, 2024, American Astronomical Society, Meeting #243, New Orleans, USA
13. Contributed oral talk: ***"Chemical Composition of Planet-Host Cool Dwarfs: The Interplay with Planetary Formation"***, November 3, 2023, Mid-American Regional Astrophysics Conference, The Benedictine College, Atchison, USA
14. 1-hour seminar talk: ***"Spectroscopy of Cool Dwarfs: Tracing Galactic Chemical Properties and Planet Formation"***, July 24, 2023, The Department of Astronomy, The University of Texas at Austin, Austin, USA
15. Contributed oral talk: ***"Elemental Abundances of JWST's Cool Host Stars: Searching for Planet-Star Chemical Link"***, June 8, 2023, American Astronomical Society, Meeting #242, Albuquerque, USA
16. Invited speaker, 1-hour colloquium talk, **"Cool Dwarfs: Clues on Chemical Structure of the Milky Way and Chemical Link between Host Stars and Their Planets"**, February 27, 2023, The Department of Physics and Astronomy, The Benedictine College, Atchison, USA
17. Contributed oral talk: ***"Detailed Elemental Abundances of a Super-Neptune Host Star Using High-resolution, Near-infrared Spectroscopy"***, January 12, 2023, American Astronomical Society, Meeting #241, Seattle, USA
18. 30-minute seminar talk: ***"High-resolution Stellar Spectroscopy: Searching for Chemical Link between Stars and their Planets"***, November 4, 2022, The Department of Physics and Astronomy, The University of Kansas, Lawrence, USA
19. Invited speaker, 1-hour colloquium talk, ***"Cool Dwarfs: Clues on the Chemical History of the Milky Way",*** October 31, 2022, The Department of Physics and Astronomy, The University of Kansas, Lawrence, USA
20. Contributed oral talk: ***"Elemental Abundances of a Super-Neptune Host Star Using High-resolution Near-infrared Spectroscopy"***, October 8, 2022, Mid-American Regional Astrophysics Conference, The University of Arkansas, Fayetteville, USA
21. e-Poster: ***"Chemical and Kinematic Properties of the Local Milky Way: Stellar Parameters of M dwarfs and M subdwarfs Using Low-Resolution Spectroscopy",*** June 28 - July 2, 2021, European Astronomical Society, Virtual meeting

22. iPoster: ***"An Improved Method for Estimating Chemical Parameters of M-Type Dwarfs: Prospects for Large, Low-Resolution Spectroscopic Surveys"***, January 10-15, 2021, American Astronomical Society, Virtual meeting #237
23. e-Poster along with 2-minute virtual talk: ***"Chemical Distribution of ~ 35,000 M dwarfs and M subdwarfs of the Local Galactic Disk and Halo: [M/H] and [α/Fe] Determinations Using Low- to Medium-Resolution, Optical Spectroscopy"***, June 29 - July 3, 2020, European Astronomical Society, Virtual meeting
24. Dissertation oral talk: ***"Chemical Substructure in the Local Galactic Disk and Halo: Fundamental Properties of 60,000 M dwarfs and M subdwarfs from Low-to-Medium Resolution Optical Spectroscopy"***, January 6, 2020, American Astronomical Society, Meeting #235, Honolulu, USA
25. Contributed oral talk: ***"Chemical Properties of the Galactic stellar Disk and Halo: Low- and Medium-Resolution Spectroscopic Sample of M dwarfs and M subdwarfs"***, June 19, 2019, Canadian Astronomical Society, Annual meeting, Montreal, Canada
26. Poster along with 5-minute oral talk: ***"Chemical Properties of Galactic Disk and Halo: Low- and Medium-Resolution Spectroscopic Sample of M dwarfs and M subdwarfs"***, April 1-4, 2019, KITP Conference - In the Balance: Stasis and Disequilibrium in the Milky Way, University of California, Santa Barbara, USA
27. Contributed oral talk: ***"Physical Parameters of M dwarfs and M subdwarfs: An Automated Method for Low- and Medium-Resolution Spectroscopic Surveys"***, January 8, 2019, American Astronomical Society, Meeting #233, Seattle, USA
28. Poster: ***"A GAIA HR-Diagram of ~1600 High Proper Motion M dwarfs and M subdwarfs with Spectroscopic Metallicity Measurements"***, July 29 - August 3, 2018, Cool Stars 20 Conference, Boston, USA
29. Poster: ***"A Spectroscopic Catalog of Nearby, High Proper Motion M subdwarfs"***, January 8-12, 2018, American Astronomical Society, Meeting #231, Washington DC, USA
30. Poster: ***"Near-infrared Photometry of the Open Cluster NGC 2420"***, January 4-8, 2016, American Astronomical Society, Meeting #227, Kissimmee, USA
31. Poster along with 5-minute oral talk: ***"Metallicity Distribution of M dwarfs and Local Galactic Evolution"***, February 2-6, 2015, KITP Conference - The Milky Way and its Stars: Stellar Astrophysics, Galactic Archaeology, and Stellar Populations, University of California, Santa Barbara, USA
32. Contributed oral talk: ***"Photometric Calibration for Determining M dwarf Metallicity"***, June 9, 2014, Splinter Session - Touchstone Stars: Empirically Determined Parameters of Cool Stars, Cool Stars 18 Conference, Flagstaff, USA
33. Contributed oral talk: ***"New Photometric Calibrations for Determination of Fundamental Properties of M stars, Galactic Chemical Evolution and Structure"***, October 31, 2014, Physics and Astronomy Graduate Conference, York University, Toronto, Canada
34. Contributed oral talk: ***"New Photometric Calibrations of Metallicity and Temperature for M dwarfs"***, May 30, 2013, Canadian Astronomical Society, Annual meeting, Vancouver, Canada
